

Pacific Resort Rarotonga Elevates Guest Experience with New In-Room Enhancements

Pacific Resort Rarotonga has made notable enhancements to its in-room guest experience by introducing JBL Horizon 2 Bluetooth speaker and alarm clock units across all 64 rooms. With this addition, Pacific Resort Rarotonga, along with Pacific Resort Aitutaki and Little Polynesian Resort, now offers these premium guest room speaker systems in every room. The JBL Horizon 2 is designed to improve the in-room atmosphere with high-quality JBL Pro Sound, a built-in LED ambient light, a digital clock with dual alarms, and seamless Bluetooth streaming. Guests can easily connect their smartphones, tablets, or other Bluetooth-enabled devices to play their favourite music, adding a personal touch to their stay.

In a further enhancement, all 64 hairdryers at Pacific Resort Rarotonga have been replaced with brand-new units, ensuring improved performance and convenience for guests. As part of a sustainable initiative, the replaced hairdryers have been donated to the SPCA for sale at their fundraising market stall, supporting animal welfare efforts in the community.

Additionally, Pacific Resort Rarotonga has undertaken a series of upgrades to its poolside rooms. These improvements include a refurbishment of the fixtures and furnishings, and upgraded shower-heads and mixers. These improvements further demonstrate the resort's commitment to maintaining high standards.

These updates reflect Pacific Resort Hotel Group's ongoing efforts to enhance guest experiences while also supporting the local community. Guests can look forward to a more comfortable and enjoyable stay, with modern amenities and thoughtfully maintained rooms. For more information about these new amenities or to book your stay, visit the Pacific Resort Hotel Group website.
